

Hannover Messe 2027: stand brief

Kernwerk returns to Hannover Messe with a stand in Hall 12 focused on the new EG-Series of energy-efficient industrial gearboxes. Everything in this brief is already public or approved for press and social media.

What we are showing

- EG-Series helical gearboxes, up to 97.5% efficiency across the full load range
- A live test rig comparing an EG-Series unit with our previous generation, with energy use shown on screen
- Condition monitoring that predicts bearing wear from vibration data, available as a retrofit kit
- Recycled-steel housings, cutting embodied carbon per unit by about a third

Key messages

Audience	Message
Plant engineers	Lower energy bills from day one, with the same footprint as the gearbox you run today
Procurement	Standard lead time of six weeks for the most common ratios
Press	Kernwerk's largest product launch since 2019

Stand

Hall 12, stand C40. Daily technical talks at 11:00 and 15:00. Stand manager: Lukas Brandt, Corporate Communications.
